

OPHTHALMOLOGY & REFRACTIVE SURGERY CENTER

Naval Hospital, Bremerton

Tuesday, December 27, 2016

To Whom It May Concern:

The patient presenting this letter is interested in undergoing corneal refractive surgery. For those patients with Obstructive Sleep Apnea needing a CPAP/APAP machine we have found that there is a higher incidence of those patients having recurrent corneal erosions post operatively, likely from blow by.

Please provide a letter indicating recommendation for or against the patient being able to discontinue use of a CPAP/APAP post operatively for at least 3 months.

Thank you for the time and assistance with this case.
